

Valve-Regulated Spill Response Kit Technical Specifications

Features:

The ACRAN Valve Regulated Spill Response Kits are specifically designed for valve-regulated, lead-acid battery rooms and are compliant with OSHA personnel safety requirements. This kit provides acid absorption, neutralization and personnel protection for small electrolyte spills and is sufficient for 1 responder. ACRAN offers a wide range of spill response kits for all battery types and individual components can be tailored to customer requirements and/or purchased individually for replenishment purposes.
