

## Battery Watering Gun S Technical Specifications

### Features:

- Automatic shutoff and pressure regulator
- High flow rate – 2 gallons/minute
- Immediate installation – Attaches to any standard hose with included quick connect fittings
- Insulated against short circuits
- Developed for watering *transparent type stationary batteries only*. Gun operates outside the cell without automatic shutoff.
- Cone shaped nozzle injects water through funnels of the flame arrestor vents, allowing service without removal of vent caps
- Manually adjustable flow throttle
